Dear Sir:

The Notice of Allowability dated August 16, 2006 requires that corrected drawings be submitted. However there are **NO** drawings in this case. A page of two figures was provided to the Examiner in December of 2002. However, these figures were presented to illustrate that the Applicants' claims were in compliance with the restriction requirement for the Examiner's convenience by providing chemical structures. They are not drawings originally filed nor are they to be published with the issued patent.

There is a sequence listing at the end of the application. Applicants believe that the sequence listing is compliant with requirements at the time of its filing in 2001. If the U.S. PTO had intended to object to the form of the sequence listing, an indication of what the objection is is respectfully requested.

Applicants contacted the Examiner regarding this matter in August. She indicated that she understood that there were no drawings, but that docketing clerk would not release the Notice

of Allowability unless box 5 (corrected drawings) was checked. She indicated that she attempted to acknowledge that the application has no associated drawings by her comment written in at the bottom of the page next to item 9 on the Notice of Allowability.

Correction of this U.S. PTO error in making a requirement for corrected drawings and issuance of a patent is respectfully requested.

Questions regarding this matter should be directed to Applicants' attorney at (224) 554-5689.

Respectfully submitted,

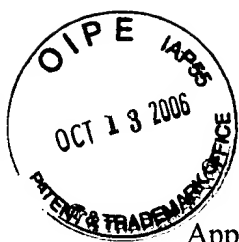

Dated: October 13, 2006
